EDUCATION

Dhanalakshmi Srinivasan University — Trichy, Tamil Nadu
Bachelor of Technology in Computer Science and Engineering – CGPA: 7.42/10.0 — *Aug 2023 – May 2027*

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL (Basic)
Frontend & UI: React.js, PyQt5, HTML5, CSS3, JavaScript, Bootstrap
Backend & AI: FastAPI, Node.js, Express.js, LLM APIs, Vision AI, RESTful APIs
Database & Tools: MongoDB, MySQL, Git, GitHub, Postman, VS Code, npm

EXPERIENCE

Codsoft — July 2026 – Aug 2026
Web Development Intern — *Remote*

- Developed a full-stack food delivery platform using React.js, Node.js, and MongoDB.
- Built RESTful APIs for authentication, order processing, and dynamic menu management.
- Optimized MongoDB schema design and indexing strategies for improved query performance.
- Ensured cross-browser compatibility and a responsive mobile-first design, enhancing user accessibility.

PROJECTS

Jarvis – AI-Powered Virtual Assistant — *Python, FastAPI, LLM APIs, Vision AI, PyQt5*

- Designed a modular AI assistant integrating multiple LLM APIs for conversational reasoning and multimodal input processing.
- Implemented backend orchestration for prompt structuring, API routing, response streaming, and structured error handling.
- Built a PyQt5-based desktop interface with speech recognition and text-to-speech enabling real-time AI interaction.
- Integrated Selenium for automated web navigation, allowing the assistant to independently fetch and synthesize real-time data.

Appointly – Multi-Service Appointment Booking Platform — *React.js, Node.js, Express.js, MongoDB*

- Developed a web-based booking platform featuring responsive React.js interfaces for intuitive service discovery and scheduling.
- Implemented robust REST APIs using Express.js and integrated MongoDB to maintain persistent user and appointment records.
- Built an interactive calendar component to manage daily time slots, effectively preventing double-booking conflicts.
- Engineered secure user authentication and role-based access control separating admin workflows from standard booking.

FoodieHub – Food Delivery Web Application — *React.js, Node.js, Express.js, MongoDB*

- Created a dynamic food delivery platform featuring restaurant listings, interactive menu browsing, and responsive cart management.
- Engineered robust backend endpoints to handle concurrent customer orders and maintain real-time database updates.
- Implemented secure authentication using JSON Web Tokens (JWT) to protect sensitive customer profiles and payment data.
- Designed a mobile-first user interface utilizing modern CSS frameworks to ensure seamless cross-device compatibility.

CERTIFICATIONS

- The Complete Full-Stack Web Development Bootcamp – Udemy
- Front-End Web Development with React – Coursera
- Server-side Development with NodeJS, Express and MongoDB – Coursera
- MongoDB Basics for Developers – MongoDB University

LEADERSHIP & EXTRACURRICULARS

- **Class Representative:** Coordinated communication between faculty and a cohort of 60+ students.
- **Member, AI & Data Science Club:** Participated in technical workshops and peer mentoring sessions.
- **Event Organizer:** Organized and conducted university-level technical and cultural events.
